

1. Executive Summary & Operational Risk Assessment

This enterprise intelligence report consolidates real-time performance indicators across hospital departments including Clinical Operations, Emergency Services, Operating Theatres (OT), Pharmacy, Laboratory, and Ambulance Services. Current metrics indicate operational bottlenecks in **ER Avg Wait Time (47.9 mins)** and **Readmission Rates (52.1%)**, requiring immediate clinical workflow and discharge planning optimization.

2. Executive Level Key Performance Indicators (KPIs)

Core Indicator	Current Value	Target / Benchmark	Operational Impact
Total Hospital Revenue	■ 30.52 Cr	■ 28.00 Cr Target	11,000 Total Patients Served
Bed Occupancy Rate	50.9%	75.0% Optimal	Healthy capacity margin available
ER Avg Wait Time	47.9 min	< 15.0 min Target	Critical overload; patient triage delay
Readmission Rate	52.1%	< 10.0% Standard	Requires discharge review & followup
Avg Patient Satisfaction	3.0 / 5.0	> 4.2 / 5.0 Target	Moderate satisfaction level
Avg Length of Stay (ALOS)	7.4 days	5.0 - 7.0 days	Standard operational turnover
OT Operating Cases	3,000	2,500 Baseline	High volume case management

3. Multi-Department Intelligence & Metrics Breakdown

Department	Key Metric / Volume	Performance Benchmark	Actionable Insight
Emergency (ER)	47.9 min Wait Time	< 15 min Target	Deploy additional triage staff during peak hours.
Ambulance Fleet	3,734 Total Trips 23.4 min Response	15 min Target ■ 20.1 L Fuel Cost	High response time; optimize fleet deployment & routing.
OT Operations	3,000 Procedures	5.2% Cancellation Rate	Schedule utilization is stable; maintain pre-op prep.
Pharmacy	■ 4.82 Cr Revenue	98.4% Fulfillment	Stock levels healthy; low stockouts reported.
Laboratory	14,250 Tests	3.2 hrs Avg Turnaround	Turnaround within limits; pathology workload balanced.
Staffing & Shifts	84.2% Attendance	92.0% Target	Night shift shortages identified in ICU & Emergency.

4. Strategic Decision-Making Recommendations

- 1 **Triage & Emergency Optimization:** Restructure ER admission protocols and deploy fast-track beds to reduce average response and waiting times from 47.9 mins to under 20 mins.
- 2 **Discharge & Readmission Protocol:** Implement mandatory post-discharge patient follow-up within 48 hours to curb high readmission rates (52.1%).

- 3 **Ambulance Fleet Dispatch:** Integrate GPS-based dynamic routing to bring average fleet arrival time down from 23.4 mins closer to the 15-min target.
